

Apex MB Irons

Product Name: Apex MB Irons

Product Intro:

Our Apex MB Irons are built for the best players in the game. It's a beautiful classic blade shape with high performance grooves, remarkable feel, and a new weight design. This is a premium muscleback in every way.

Features & Benefits

Tour Shaping and Design

A classic shape and style, with a traditional, thin topline, refined sole, compact blade length and stunning chrome finish.

High Performance 20V Grooves

Precision grooves are designed to promote the high level of control and consistent spin that muscleback players expect out of any playing conditions. The 20V grooves also stand out for reducing fliers from the rough to deliver even more control.

New CG Weighting

We've engineered a new weight in the center of the clubhead. This allows us to precisely dial in swingweights without sacrificing CG location.
